VANTAGE CONTROLS ARE

A D E S I G N E R ' S D R E A M

*You focus on the design, and we focus on making it come to life.*

## OPTIMAL CONTROL

Through our Fixture Alliance, we give you freedom to choose any fixture from the biggest name brands in the lighting industry, allowing you to rest easy that your lighting designs will come to life as imagined. Taking the guesswork out of control includes testing every fixture and creating pre-configured tunable profiles which are added to our LHUMAN KolorTune™ Library within the Vantage Design Center Software. And to ensure that transitions are smooth, lower and upper limits of the fixture's CCT range are already defined as well as the dimming curve from warm to cool.

## UNPARALLELED DESIGN

And with our Keypad Alliance, you'll never have to choose between function and design. Achieve a one-of-a-kind, luxurious lighting control experience with Vantage's lighting control solution integrated with keypads from any of our partnered manufacturers. Using Vantage's Design Center software, integrators can effortlessly program any keypad from the alliance as part of any Vantage project.

FIT & FINISH

“ We have been using Vantage as one of our primary replacement systems for nearly 10 years. They have a quality product, that has multiple options and paired with outstanding support. Our Vantage team is the best and we can always count on them to deliver! ”

Paul Biava, President, ETC

## GORGEOUS WALL & ACCESSORY FINISHES

Our aesthetically pleasing wall controls come in a range of designs and finishes including options that perfectly match our decorative shading brackets. Mix and match designs and button styles to ensure your system fits your personal style and coordinates with electrical outlets and audio video connections from Legrand. Complete the project by choosing from almost 700 fabrics within our curated collection from Legrand Shading Systems.

## ONE SCALABLE SYSTEM

Legrand offers a single, scalable solution, unlike other products on the market. So it doesn't matter what size project you're working on, you only need to learn our one product. Other systems are quickly outgrown, requiring a switch to a completely different product. With Vantage Controls, start small and scale the system as desired.

## INTEGRATED, MOTORIZED SHADING

You can't design lighting without managing daylight which is why Legrand's automated shades are the perfect compliment to every installation. Harvest natural daylight, assign scenes and set schedules through our app, and choose from a variety of high-end fabric options to match the home's aesthetic.

## INTUITIVE APP

Our user-friendly app allows you to control lighting, dimming, CCT and RGB, set room scenes and timers, and control shades. When combined with our LHUMAN system, complete human centric lighting control is possible.

“ Making adjustments to programmed scenes can be a tedious process. With Vantage, programming adjustments are smooth and seamless, making changes a breeze. ”

Joel Visser, Co-Founder & Director of Engineering at Number Eight Lighting

## HYBRID (WIRED + WIRELESS) SOLUTION

Designed to go together, you can effortlessly combine wired and wireless lighting controls on any job. Even our wired and wireless shades look identical, allowing you to mix and match on projects as well. Every one of our dimmers is also a keypad—so no need to figure out which one goes where. And as designs inevitably change, rest assured that you have the most flexible system on the market.

## NO SWEAT WIRING

Our unique 2-wire bus makes installation easy, delivering a dependable, high-quality solution. And unlike other products on the market, Vantage station bus is non-polarized and can be run as daisy-chain or branched pattern, giving the installer greater flexibility, significantly reducing errors.

## GREATER POWER DENSITY

Our panel-based lighting solutions allow for 50% more loads in the same size enclosure than competitors. This equates to a smaller footprint in the mechanical room for the same size system, saving space and money.

## INSTALLER-FRIENDLY MODULES

Our patented module design snaps into our panels, so you can install without the use of tools! This allows an electrician to complete all the wiring and verify the loads are operational **before** installing our dimming modules, eliminating the opportunity for damaging product due to miswiring.

PARTNER  
WITH US

“ The level of specification assistance and collaboration — Vantage has provided our design team is unparalleled. ”

Marissa Tucci, Tucci Lighting

## INDUSTRY EXPERIENCE

With more than 30 years of experience, we have installed Vantage Controls in over 50,000 projects worldwide. We can refer over 1,000 certified installation partners in North America, and hundreds more around the world. When you choose Legrand, you're choosing a true partner dedicated to your success.

## SERVICE & SUPPORT

We offer complimentary design services and are ready to shepherd your project from start to finish. Our mission is to be the easiest company to do business with for each and every one of our customers. We believe in providing the best service possible, and that our service is not based on how large our customers happen to be.
