

# EQUINOX 41 LCD TOUCHSCREEN

With its minimalistic on-wall presence Equinox 41 functions as a graphical user interface to the Vantage system and provides a personalized dashboard for multi-system control. Key to accomplishing this are the on-screen widgets. Once configured, widgets can easily be edited on the device itself. In addition, individualized profiles can be created based on time of day, location, function, or individual.

Utilizing the power of InFusion and Design Center software Equinox devices come with both a predefined graphical interface and an auto-configuration capability. This predefined environment allows integrators to efficiently create intuitive screens that are consistent with the entire user environment while InFusion provides the ability to completely customize the luxury space.
