

iPAD® - iPHONE® APPLICATION

User Interfaces / Software

Bring your own touchscreen on your iPad/iPhone/iPod Touch - free designable

Gain convenient access to your Vantage home control system throughout your home as well as on the go. Transform your iPad® and iPhone® into a fully customizable mobile touchscreen and manage your entire Vantage Home automation system from the palm of your hand (landscape or portrait view).

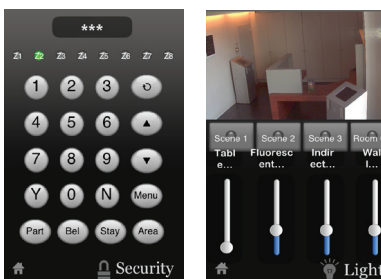

Vantage integration solutions such as lighting, comfort, security and entertainment can be easily viewed and managed in real time. The simple and intuitive app provides control and feedback for surveillance cameras, area light levels, room temperature, as well as audio zone and source status etc The ability to browse and play Vantage music sources, use the Vantage touchscreen as a remote control for your television set or home theatre system, or select a radio station makes it easy to set the scene for a perfect evening of entertaining at home.

Control multiple locations, such as a main home, second home or vacation home. The application constantly gives you information and feedback of all integrated functions and leverages the use of your mobile device as a single remote control point for your home automation system.

Free demo at Apple store

Try out this app for free. The demo version can be downloaded for free from the iTunes store. Afterwards the app can be activated through a local certified Vantage dealer.
