

## Vantage Voice FAQs

### Features & Functionality

- 1. What setup options are available in the Alexa app?**
  - Add/remove scenes to a room or device group, specify command prompts, creating and managing a Routine (multiple actions grouped together)
- 2. How many tasks can be controlled?**
  - Alexa can control up to 60 tasks per Vantage system
- 3. Can an existing project with an InFusion Controller add Alexa integration?**
  - Yes, if the project contains an IC-II, IC-DIN-II, or IC-DIN-II-LITE InFusion Controller. It is not compatible with version one of the InFusion Controller.
- 4. Can any lighting related command be spoken to Alexa and recognized?**
  - Voice execution of a scene is a trigger that executes a Task. Therefore, users cannot dictate commands that are outside of Task programming.
- 5. Can Alexa trigger commands that simulate a button press and button hold?**
  - Voice tasks simulate a button press, not a button hold.
- 6. What languages are available?**
  - English, other languages may be added after release

### Setup

- 7. What is required for Alexa integration?**
  - IC-II, IC-DIN-II, or IC-DIN-II-LITE InFusion Controller
  - Amazon Echo device and Alexa app (iOS or Android)
  - Design Center 4.9.0 or newer with dictation-safe Functional Tasks setup
  - Individual Legrand Cloud names that link with the individual Alexa accounts
- 8. How can tasks be named?**
  - Task names must be dictation-safe with correct English spelling and no special characters.

### Changes

- 9. What can end users manage via their Alexa app?**
  - Although users will be able to access and manage the Vantage InFusion System Control Skill through their Alexa app as with other enabled Skills, it is recommended they consult their dealer for any change to ensure updates are properly performed.

#### **10. What steps need to be taken if there is a replacement controller on project?**

- If system's main controller (C#1) has been replaced, please follow the "IC Replacement Alexa Setup Instructions" in the Voice User Guide to clear all Scenes from the user's Alexa account.
- After deleting all Scenes from the Alexa account, the new InFusion controller will need to be setup again per the User Guide instructions.
